Profile

I spend time learning different tools to build useful and creative projects often integrating AI for smart and adaptive features.

EDUCATION

M.S. / Computer Science (Informatics)

October 2025 - Current

Technische Universität Berlin, Berlin, Germany

B.S. / Computer Science and Engineering

September 2019 - June 2024

Sabanci University, Istanbul, Turkey

Exchange Program / Artificial Intelligence

February 2023 - August 2023

Johannes Kepler University, Linz, Austria

WORK EXPERIENCE

Software Developer

June 2025 - October 2025

Nanbis Inc., Istanbul, Turkey

- Built and maintained **React Native** mobile application using **3 AI APIs** and combined them for desired output.
- **Published** on **AppStore** and took care of customer's support.

Research and Teaching Assistant

September 2024 - October 2025

Sabanci University, Istanbul, Turkey

- **Gave lectures, graded exams/quizzes** on software engineering course.
- **Held office hours** for students who need assistance on their term projects and exams.
- **Planned the architecture and built** Tubitak supported **Unity-VR** project.
- **Published** project using **WebGL and Azure**.

Software Developer Intern

July 2023 - September 2023

Testinium, Istanbul, Turkey

- **Fixed bugs** and added **new features** using **Typescript** language with co-workers.
- Used **Github** to work simultaneously and avoided merge conflicts in **Agile Development** cycle.

PROJECTS

10 Published IOS Applications

August 2025 - Current

- **Designed and developed** IOS applications using mainly **Swift and Supabase**.
- **Published** on AppStore and currently have **paying customers**.

Published Article

September 2024 - September 2025

- **Published article** "Evaluating Usability Gaps in Passthrough Mixed Reality Interfaces" on **Q1 ranked Journal**.
- **Experimented** how the passthrough feature of the **Meta Quest 3** affects users on performing everyday tasks.
- **Evaluated and analyzed** results to create highly detailed report.

AI Interviewer AWS

August 2025 - October 2025

- Created website using **React** and **AWS** services.
- Users can **upload their resumes** and it calculates **ATS score** according to the job description.
- Gives suggestions to improve cv and does a **mock-up interview** using **AWS Bedrock**.
- **S3, Gateway and Lambda functions** provide private, efficient performance.

Unity VR Game Engine

September 2023 - September 2025

- **Designed** the **architecture** and **built** project.
- Used **Unity, WebGL and Azure** tools for the project and **published** it on website.
- Users create their own environment with the help of clean UI, 200+ optimized assets, detailed animations and block-coding functionality.

Gesture-Based Interaction

September 2024 - February 2025

- Built **Python** project using **Tkinter, OpenCV and MediaPipe**.
- Allows users to use their **gestures** to **interact** with application so they can scroll through their photo gallery.

Pattern Classification Model

February 2023 - July 2023

- Built **machine learning model** with **Python** to predict **birds' species** using **huge amount of sound data**.
- **Transformed sound data** into multidimensional arrays to work with.
- Used **classical ML methods** and **Python libraries** such as **scikit-learn, matplotlib, numpy**, etc. for better representation of data and to find most **useful features** to work with.
- Implemented **train, validation and testing** to evaluate the model. Used **PCA and cross-validation** for best outcomes.

SKILLS

Git • Cloud • CI/CD • Docker • AWS • Supabase • Machine Learning • SQL • Unity • Swift • Python
• Scikit-learn • Numpy • React • JavaScript • TypeScript • C++ • AR/VR

LANGUAGES

Turkish (native) • English IELTS 7.5 (C1) • German (beginner)
